Interior Secretary Zinke Applauds Mine Proposal to Create Jobs in Virginia and West Virginia

(WASHINGTON) Today U.S. Secretary of the Interior Ryan Zinke applauded the initial construction of the Berwind Mine located on the border of West Virginia and Virginia. Developers expect the mine to create 50 good-paying local jobs. The Berwind Coal Reserve is estimated to contain about 72 million tons of clean recoverable metallurgical coal, which is critical for infrastructure and is used for steel, roads, bridges, and building construction. The Berwind Mine will produce about 800,000 tons per year and will create jobs in some of the hardest-hit areas of Appalachian region including McDowell County, West Virginia as well as Buchanan and Tazewell Counties in Virginia.

Although the mine is on private land, the Department of the Interior had a role in approving wildlife protection plans for the Big Sandy crayfish in conjunction with the State of West Virginia's Department of Environmental Protection. There are currently about a dozen pending projects that require USFWS coordination in the region.

"Appalachia's coal workers are at the heart of rebuilding our nation's infrastructure because we can't build if we don't access our natural resources," **said Secretary Ryan Zinke**. "Under President Trump's leadership, the Department of the Interior is dedicated to being a good partner with local communities. This administration is dedicated to streamlining permitting and approval processes, cutting red tape, and empowering local employees to get work done on the front lines -without cutting corners on environmental requirements. The Berwind Mine is the first of many many projects that prove the Trump Administration's commitment to coal country and to good government."

QUOTE Ramaco

The mine developers submitting their application for permit in the summer of 2016; however, due to complications with the wildlife management plans for two species of crayfish, the permitting process stalled. On June XX, 2017, Interior officials visited West Virginia to meet with the private and government stakeholders. The group was able to develop a plan to protect the crayfish and go forward with the mine. On June 26, the project was approved by the West Virginia Department of Environmental Protection and on July 5, initial construction began on the new mine. Since the June meeting with Interior officials and the WVDEP, official guidance was issued by the USFWS field office which will help ensure timely approval of the pending projects.

QUOTE WV Coal Association

"The expansion of the Berwind mine will create 50 well-paying jobs, and is a perfect example of what we can achieve when government works as a partner not an adversary," **Senator Manchin said**. "It is good news for McDowell County and all of West Virginia. We know that coal will be in the energy mix for decades to come and I'm encouraged by the work of Secretary Zinke and the Fish and Wildlife Service in ensuring this project moves forward. This mine will produce 800,000 tons of clean recoverable metallurgical coal annually that will help rebuild our roads, bridges, and other critical infrastructure. This mine is a key ingredient to powering our country's infrastructure restoration. I look forward to hearing about Berwind mine's positive impact on McDowell County, I applaud this decision, and I will continue to fight for economic growth throughout our great state."

QUOTE SEN CAPITO

"I welcome the expansion of the Berwind mine, which extends into Buchanan and Tazewell Counties," **said Virginia Congressman Morgan Griffith**. "Miners, other workers at the mine, and employees of mining supply companies will be put to work and be able to spend money in their communities. Localities will receive the appropriate coal severance taxes, which will help support their schools. Thus, Southwest Virginia will benefit from this move."

"Finally, after eight years of anti-coal policies, coal is beginning to see a rebound," said **West Virginia Congressman David B. McKinley, P.E., chairman of the Congressional Coal Caucus**. "From increased exports to new mines opening, we're seeing positive developments in coal country. The Trump Administration is committed to bringing coal jobs back, and we look forward to working together to do just that."

QUOTE WV Secretary of DEP Austin Capron

Your message to thomas.clarke@wv.gov couldn't be delivered.

thomas.clarke wasn't found at **wv.gov**.

landon_davis
Action Required

Office 365

thomas.clarke
Recipient

Unknown To address

How to Fix It

The address may be misspelled or may not exist. Try one or more of the following:

- Send the message again following these steps: In Outlook, open this non-delivery report (NDR) and choose **Send Again** from the Report ribbon. In Outlook on the web, select this NDR, then select the link "**To send this message again, click here.**" Then delete and retype the entire recipient address. If prompted with an Auto-Complete List suggestion don't select it. After typing the complete address, click **Send**.
- Contact the recipient (by phone, for example) to check that the address exists and is correct.
- The recipient may have set up email forwarding to an incorrect address. Ask them to check that any forwarding they've set up is working correctly.
- Clear the recipient Auto-Complete List in Outlook or Outlook on the web by following the steps in this article: [Fix email delivery issues for error code 5.1.10 in Office 365](#), and then send the message again. Retype the entire recipient address before selecting **Send**.

If the problem continues, forward this message to your email admin. If you're an email admin, refer to the **More Info for Email Admins** section below.

Was this helpful? [Send feedback to Microsoft.](#)

More Info for Email Admins

Status code: 550 5.1.10

This error occurs because the sender sent a message to an email address hosted by Office 365 but the address is incorrect or doesn't exist at the destination domain. The error is reported by the recipient domain's email server, but most often it must be fixed by the person who sent the message. If the steps in the **How to Fix It** section above don't fix the problem, and you're the email admin for the recipient, try one or more of the following:

The email address exists and is correct - Confirm that the recipient address exists, is correct, and is accepting messages.

Synchronize your directories - If you have a hybrid environment and are using directory synchronization make sure the recipient's email address is synced correctly in both Office 365 and in your on-premises directory.

Errant forwarding rule - Check for forwarding rules that aren't behaving as expected. Forwarding can be set up by an admin via mail flow rules or mailbox forwarding address settings, or by the recipient via the Inbox Rules feature.

Recipient has a valid license - Make sure the recipient has an Office 365 license assigned to them. The recipient's email admin can use the Office 365 admin center to assign a license (Users > Active Users > select the recipient > Assigned License > Edit).

Mail flow settings and MX records are not correct - Misconfigured mail flow or MX record settings can cause this error. Check your Office 365 mail flow settings to make sure your domain and any mail flow connectors are set up correctly. Also, work with your domain registrar to make sure the MX records for your domain are configured correctly.

For more information and additional tips to fix this issue, see [Fix email delivery issues for error code 5.1.10 in Office 365](#).

Tucker,

Here's what we have for attribution to Secretary Caperton in the press release:

"The legislation that created the WVDEP mandates that we protect the environment 'in a manner consistent with the benefits to be derived from strong ... energy-producing industries' (WV Code 22-1-1(b)(4)). We applaud all efforts at the federal level that allow us to carry out our mission and strike the proper balance."

Thanks for contacting us on this.
